EXPERIENCE

Xolodilnik

Oct 2024 – Present

Flutter Developer

- Built the Xolodilnik **mobile app ecosystem** — customer, courier and warehouse apps — covering the full order-to-delivery process of an online grocery store.
- Designed and built the **customer app** (**10K+** downloads on Google Play): product catalog, cart, checkout, authentication and backend API integration.
- Automated delivery logistics in the **courier app** — order management, route building, status tracking and real-time updates — and built a **warehouse app** for inventory and stock movement.
- Implemented a scalable, modular architecture with **Bloc/Cubit** and **Clean Architecture**, with a unified API layer shared across all apps.
- Integrated **background services** for delivery tracking and data sync, and **Method Channels** for native Android/iOS features.
- Optimized performance, networking and local data handling; published and maintained apps on the **App Store** and **Google Play** with **CI/CD**; ran code reviews and testing.

Projects: [Xolodilnik](#)

TAD Industries

Jun 2023 – Oct 2024

Flutter Developer

- Lead developer of **biometric identification** and **access-control** systems built with Flutter and native platform technologies.
- Built and deployed identification solutions using **Face ID**, **fingerprint scanners**, **NFC** and **QR** codes.
- Integrated hardware and platform-specific SDKs through **Method Channels**, connecting Flutter apps to biometric APIs, terminals and external identification devices.
- Implemented biometric verification and real-time data processing, with stable background processes and data sync for devices running continuously under high load.
- Tested, diagnosed and maintained enterprise digital-identity systems, fixing bugs and shipping updates.

EDUCATION

Tashkent University of Information Technology

2024

- Bachelor, Information Security

PDP Academy

2023

- Flutter Developer program

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, Method Channels, Isolates, Background Services

Architecture: Bloc / Cubit, Provider, Clean Architecture, MVVM, SOLID, OOP, GoRouter, dartz

Data & Integrations: REST API, HTTP, Firebase, OneSignal, Hive, SQLite, Yandex Maps API, WebView, Localization

Testing & Tools: Unit Testing, TDD, Git, CI/CD, Figma, App Store & Google Play releases

Languages: Uzbek (native), English (B1), Russian (B1)

OTHER PROJECTS

- **Maydon** — football pitch search & booking app: interactive Yandex map with GPS, filters, quick booking and reminders. [Google Play](#)
- **OkeyBo** — 24/7 family doctor & telemedicine app: chat, audio and video calls, home visits and a digital medical E-Card (1K+ downloads). [Google Play](#)
- **OkeyBo Doctor** — doctor-side app of the OkeyBo platform: patient requests, secure chat and recommendations. [Google Play](#)
- Case studies of these apps — the problem, architecture decisions and outcomes. **Explore my work:** [\[yourdomain.uz\]](#)
